INSIDER

SURFACE MOUNTING

Insider is a linear aluminium profile characterized by a backward source that guarantees optimal visual comfort and a defined beam of light. Surface mountable with clips (included), it is used to light the inside of cabinets: the version with integrated PIR sensor allows it to be switched on and off when the door is opened and closed. The LED source is available with Natural (4000K), Warm (3000K) or Emotion Dual Color colour temperature which allows the variation from 3000K to 4000K. On request, the length can be customized up to a maximum of 3 m.
