

# K CONCEPT - ACCESSORIES

## SURFACE MOUNTING

K Concept is a light panel that, when used as a backrest, allows the worktop to be illuminated in an elegant and comfortable way. The LED source Emotion Dual Color allows the variation of the colour temperature from 3000K to 4000K; the Wall Washer version integrates a vertical effect of wall washing that can be activated independently. The dedicated line of accessories, including shelves, roll holders and electrical sockets, allows you to better organize the workspace. The panels, of customizable size, can be combined with each other using K Socket module as a junction.
